

BUR GUARDS

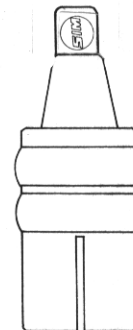

**SIM005-094
 BUR GUARD
 (XXX-LONG)**
 For Use With
 125mm Burs

**SIM005-093
 BUR GUARD
 (X-LONG)**
 For Use With
 95mm Burs

**SIM005-092
 BUR GUARD
 (LONG)**
 For Use With
 70mm Burs

**SIM005-091
 BUR GUARD
 (MEDIUM)**
 For Use With
 54mm Burs

FITS: HALL: MICRO 100 & MICRO DRILL 3M: DRILL MINOS: AIR DRILL

SIM Bur Guard Advantages

1. Anodized Bur Guard body for increased durability.
2. Contrasting black anodized body / silver shaft increase visibility and decrease chances of misplacing bur guard.
3. Bur Guard Shaft is Constructed of stainless steel for greater strength over competitors' aluminum alloy.
4. Bur guard shaft contains 2 bearings (competitor's only have one bearing) to provide greater support and smoother rotation of burs. Also increases lifespan of bur guard two - three times.
5. X-Long and XXX-Long bur guards available for use in restricted access procedures.
6. Combination of the above micro-drills and SIM bur guards increases the surgeons control of the bur through the variable speed of the drill and the added lateral support of the bur guard.
7. Along with providing the highest quality, SIM bur guards also offer a substantial cost savings over competitors bur guards.
